Arvika peas
Forage+ forage oats
T2700 spring triticale
DS Admiral grain peas

INOCULANTS

Sweet Forage 50G, dry granule silage
Sweet Forage WS, water soluble silage

To the degree that the seeds were represented to us, while in our control and possession or during the production process, and to the best of our knowledge, were not modified with genes that would be considered "Genetically Modified Organisms" (GMOs).

We do not guarantee that any of these products are 100% free of the adventitious presence of GMOs.
